

Work in a daycare focussed on needs and education

The Framework for Early Childhood Education & Care in Switzerland identifies six guiding principles, which are the foundation for educational work in daycare centers. The subject of this course is how to implement these guiding principles successfully in your daycare. The course is designed for foreign educational professionals in daycare centers.

“Children are from birth active and self-determined. Early childhood education and care can not only be accomplished by teaching, instruction and knowledge transfer according to the plan. The educational process in early childhood is always related to concrete everyday situations of the child. They are embedded in everyday experiences and immediate environment of the child.” (Orientierungsrahmen S.24)

The Framework for Early Childhood Education & Care in Switzerland („Orientierungsrahmen für frühkindliche Bildung, Betreuung und Erziehung in der Schweiz“ OR/2012) identifies six guiding principles, which are the foundation for educational work in daycare centers.

The subject of this course is how to implement these guiding principles successfully in your daycare.

The course is designed for foreign educational professionals in daycare centers. The teaching language is in English and the course materials are written in English.
